

# TOMÁS MARENCO

SOFTWARE DEVELOPER

## PROFILE

Full Stack Web Developer with 3+ years of experience, specializing in React, Angular, Next.js, JavaScript/TypeScript, and Node.js. Since 2021, I've developed and optimized scalable web applications for large clients in industries such as insurance and fitness. My main expertise lies in React, where I've built dynamic, responsive, and user-friendly interfaces. Skilled in creating APIs, refactoring legacy codebases, and improving performance. Team player. Eager to contribute to innovative projects that deliver real value. Currently pursuing a degree in Analyst Systems at ORT University to further enhance my skills.

## PERSONAL INFORMATION

Date of birth: 07-02-1996

Nationality: Argentina

City: Ciudad de Buenos Aires

Cellphone: 15-3516-7954

## RELEVANT EXPERIENCE

### Software Developer

10/2021 - Present

Company: Gen-IT

- Developed web applications from scratch and provided support for legacy projects, resolving bugs and implementing continuous improvements in full stack environments.
- Refactored and optimized applications for large companies in the insurance and fitness sectors, applying Clean Code principles and design patterns, which improved performance and maintainability.
- Implemented multiple APIs in a backend to integrate an AI-powered chat, managing queries about calendars, products, stock, and payment coupons, through external service connections and webhook reception.
- Improved API response times, achieving over 30% reduction in load times by optimizing queries and handling data more efficiently.
- Redesigned quotation forms for one of the leading insurance companies, enhancing the user experience with advanced validations and optimizing the data submission process for thousands of customers.
- Designed user interfaces with responsive layouts, ensuring adaptability across multiple devices and improving the user experience on both mobile and desktop.

## EDUCATION

### SYSTEM ANALYST

08/2024 - PRESENT - ORT

### FULL STACK DEVELOPMENT

10/2020 - 05/2021 - DIGITAL HOUSE

## STACK

- React
- Angular
- Next.js
- Node
- Express
- JavaScript / Typescript
